Wednesday Keynote Speaker

At only 17 years old and working as a construction labourer, Curtis and his crew attempted to transport a grain bin under power lines. After discussing the power lines and how it “had the potential to kill somebody”, the unimaginable happened minutes later to Curtis Weber. Given 0% chance to survive, he will tell you his story of triumph over tragedy.

Thursday Keynote Speaker

Joe MacInnis is a medical doctor who studies leadership and teamwork in life-threatening environments from the deep ocean to outer space.

Joe is the first Canadian to dive down to the Titanic shipwreck and the first man to dive and film under the North Pole. Joe will share his experiences, the importance of teamwork and safety in the workplace.
