NEW! PERSONALIZED TRAINING FOR SPECIALTY MODULES

EXCLUSIVE TRAINING OPPORTUNITIES

OSSGA can develop exclusive training opportunities for individuals, teams or your entire organization. OSSGA will work with you and our certified trainers to develop the training you require, when you need it.

SAFETY FIRST

OSSGA is able to offer training even under strict lockdown protocols per Ontario regulation 82/20 section 58. Numerous health and safety measures are used during all training sessions and include the completion of health forms, temperature taking, mandatory masks wearing and hand sanitizer use. Class sizes are limited to ensure safe physical distancing.

MEETING YOUR NEEDS

Certified training is led by experienced and government qualified instructors. These modules include both theory and practical training. Participants who successfully complete the training and test will receive a record of certified training.

WHAT OSSGA MEMBERS ARE SAYING

"OSSGA provided quick scheduling that accommodated our operational needs in order to get the required training. We were able to complete the training safely online and in-person without any issues which facilitated logistics during the pandemic."

Sébastien Ricci
Operations Manager, Dyno Nobel

"OSSGA's online training tool encompasses Quality Training from Quality Trainers. Learning from this platform allows for memorable interactions that provides our team with quality teachings that we can easily associate with, making the knowledge learned effortlessly incorporated into the workplace. Thank you for this amazing transition from the classroom to the zoom room!"

Christine DeShane, Health and Safety
Co-ordinator Nelson/Waynco Aggregates

"The Common Core Surface Miner Training was a well-delivered, essential course. It was especially relevant to have the instructor conduct on-site training at our sand pit."

Kim McNab-Jenkins
Office Manager, ELM Enterprises

"We are super satisfied with the training we received from the OSSGA. Our trainer was very professional, friendly and dealing with the current pandemic, he handled things very well and very safe. He also made everyone feel at ease since some were a little nervous about having at work "schooling". All in all it was a great experience for everyone."

Dawn Forbes
Manager, Forbes Sand & Gravel Ltd.

AVAILABLE TRAINING MODULES FROM OSSGA

U5033 – Operate Elevated Work Platform. Under regulations 147 from OHSA this training also requires a specific training session on each specific model. Operators also require fall protection harness training or WAH. Working at Heights is highly recommended.

U5034 – Operate Hydraulic Excavator.

U5035 – Operate Skid Steer.

U5036 – Operate Dozer.

U5037 – Operate Scraper.

U5038 – Operate Grader.

U5039 – Operate Front End Loader.

U5040 – Operate Fuel Truck. Any truck with a fuel tank at the back of it would be considered a fuel truck. Operators should also have spill response training and fire extinguisher training.

U5041 – Operate Services Vehicle. This is for all maintenance personnel. They may also require module #s U5040, U5044, U5051, U5052, U5053, U5057.

Certain service vehicles also have a small boom and if equipped they would require hoisting/rigging training and mobile crane 0-8 tons.

U5042 – Operate Production Haulage Truck. Any truck of any size which is being used to take material from a face to a crusher or screener. Also any truck being used to stock pile material.

U5043 – Operate Water Truck. Any truck with a tank at the back of the truck with water being used to control dust on site.

CHOOSE THE MODULES YOUR TEAM NEEDS

U5044 – Operate Forklift. Forks added to any backhoe, loader or skid steer would be considered a forklift or any specific forklift. Forklift also requires additional training for the specific class of forklift being operated.

U5045 – Operate Portable Conveyor.

U5046 – Operate Stationary Conveyor / Radial Stacker Conveyor.

U5047 – Operate Portable Crusher.

U5048 – Operate Stationary Crusher.

U5049 – Operate Portable Screen.

U5050 – Operate Stationary Screen.

U5051 – Operate Generator over 10kVa. Certain welders have built in generators over 10kVa.

U5052 – Operate Portable Pump. Any water pump of any size. Gas, diesel, electric ect.

U5053 – Operate Compressor. Any operator operating any air tools or hydraulic tools also is required to have basic training on tools and is required to wear safety glasses and a face shield.

U5054 – Operate Production Drill.

U5055 – Handle Blasting Agents, Explosives and Detonators.

U5056 – Blast Rock.

U5057 – Operate Flame Cutting Equipment. Any equipment being used to cut or heat metal. Using oxygen with acetylene or oxygen with propane. If using an open flame torch or open flame heater additional training is required under the TSSA rules.
